WIN a family trip to Disneyland®

The Newest Attraction: BIG THUNDER Mountain Railroad

Disneyland is celebrating its 25th Birthday and Sears is joining the fun! We're offering your child and up to 3 other members of your immediate family the opportunity to celebrate first hand... to experience the excitement of an all expense paid weekend (incl. round trip air transportation) at the "Happiest Place On Earth," where you will ride Disneyland's newest and most thrilling attraction, "Big Thunder Mountain Railroad," and maybe even meet Winnie the Pooh, too!

HERE'S HOW TO ENTER: Children from 3 through 16 years of age can enter—and if they like to draw they will love this contest. Entrant should draw and color a picture of entrant and family having fun at Disneyland with any one or more of the famous Disney characters (Winnie-the-Pooh, Mickey Mouse, Goofy, Donald Duck or any of the others). Each drawing must be submitted on a sheet of paper no larger than 8½ by 11 inches. Only crayons, colored pencils, felt-tip pens or watercolor paints should be used. Drawing should be attached to a Sears official Disneyland Trip Entry Blank and mailed to:

Sears Family Trip to Disneyland Contest
P. O. Box 9253
Blair, Nebraska 68009

HOW TO OBTAIN AN ENTRY BLANK: An entry blank will be included with any Winnie-the-Pooh, Sunny Bunch or NFL item ordered from the following pages in this 1979 Wish Book. The more items ordered, the more entries that can be submitted.

Sears Winnie-the-Pooh items are on the following pages:

Little Boys and Girls Apparel on pages 22-23, 25-26, 30, 32-33, 39.
Furniture and Accessories on pages 35 and 335.
Toys and Gifts on pages 37, 41, 461, 498, 558, 565, 578, 584-591, 597, 600, 601, 636.

Sears Sunny Bunch items are on the following pages:

Girls' Fashions on pages 11, 96, 97, 98.

Toys and Gifts on pages 508, 509, 541, 566.

Sears NFL items are on the following pages:

Boys' Apparel on pages 17, 25, 52-63.
Furnishings and Gifts on pages 48-51, 180-181.
Sporting Goods and Games on pages 453, 455, 458, 577, 634.

WHO WILL WIN: All entries must be received by Feb. 15, 1980 and will be judged by an independent judging organization based on originality and creativity, technical ability and appropriateness. There will be 50 winners nationwide among five age groups. There will be ten winners in the 3 through 4 year age group, ten in the 5 through 6 year age group, ten in the 7 through 9 year age group, ten in the 10 through 13 year age group and ten in the 14 through 16 year age group. Duplicate prizes will be awarded in case of ties.

So hurry and get in on the fun. Shop through the pages of this Wish Book and find the Winnie-the-Pooh, Sunny Bunch and NFL items.

This contest is void in Florida, Vermont and wherever prohibited by law.

So easy to buy when you just use the phone.

You can race them because each operates on a different frequency!

Set your car to go fast or slow by hand, then use the radio control to turn right, left or shift into reverse. Never before has Sears offered all these features at such a low price!

Only \$18⁹⁹ each without batteries

It's Porsche vs. Corvette in a classic confrontation. 12 hours at Sebring . . . 24 hours at Daytona . . . this afternoon in your house or driveway! Radio-controlled Can-Am Corvette and Porsche 917K each "hear" a different radio frequency so you and a friend can have actual races. Lay out a course with the five pylons included with each car and then use actual racing maneuvers to flash past the finish line in first.

Slingshot around your opponent on a corner and then blast down the straightaway in an endurance race. Make tight-radius turns through pylons in an auto cross.

REALISTIC DETAILS LIKE THOSE SEEN AT LeMANS

Both cars have mag-type wheels with fat racing-style tires, colorful racing decals and low body profiles that help them hug the ground. The Porsche has stabilizing fins and realistic-looking engine air intakes in back. The Corvette has aerodynamically widened rear bodywork and a front air dam.

BROADCAST YOUR RACING COMMANDS

The radio-racer remote control transmitter has a streamlined design for easy handling. As the car moves forward, a light touch on the racing-style steering wheel turns it left or right. Touch a button and the car shifts into reverse to avoid crack-ups. Transmits up to 30 ft. indoors, 60 ft. outdoors.

Cars are made of plastic with metal parts and measure 7½ inches long. Radio-control transmitter is plastic with spring antenna. Imported.

AGES: 8 years and up.

ORDERING INFORMATION: Preamsembled. Each car requires one 9-volt and 2 "AA" batteries, each transmitter one 9-volt battery, not included. Order batteries below or rechargeable batteries, charger on opposite page. See Note, opp. pg.

Electric Sportavia

... the totally electric, ready-to-fly, radio-controlled plane

With Electric Sportavia there's no "fueling" around! Why fuss with gas or waste valuable flying time trying to get an engine started? Just flip a switch to start Sportavia's powerful electric motor and you're ready for take-off with the first totally electric, ready-to-fly radio-controlled plane ever offered by Sears!

USE PILOTING SKILLS FOR EXTENDED FLIGHT

Over three minutes of powered flight lets you take Sportavia up to soaring height. After that, your own skill determines how long you stay up. With practice, a good pilot can manage up to 20 minutes of gliding flight.

A giant, 70-inch wingspan produces plenty of lift, while the two-channel radio-control allows use of both rudder and elevator to give you the fine control needed for performing tricky maneuvers. The radio control's digital-proportional sticks help add realism to your flight... use a light touch for fine course adjustments or a "heavy hand" to bank, dive or roll. Sportavia has the capability to perform almost any maneuver you care to try!

READY TO FLY

No building or gluing is required. Sportavia is made of molded polystyrene foam and plastic with factory-decorated finish. Wings, tail group and landing gear remove for convenient transportation. Snap-in radio installation.

Includes rechargeable nickel-cadmium battery pack, battery charger; plugs into 12-v. auto cigarette lighter receptacle, recharges in about 20 min. (order replacement nickel-cadmium battery pack below to minimize time between flights).

Radio (imported) requires 12 "AA" alkaline batts. (order from opp. pg.). Operation of Sportavia requires class "C" FCC license (avail. free upon request from FCC). Ship. partially assembled. FOR AGES: 14 years or older.

ORDERING INFO: See warranty note, p. 648.

Video Arcade™ Cartridge System

Turns any TV set
into a family
game center

\$154⁹⁵

In our 1977 Wish Book, Sears introduced a new, programmable video game called Video Arcade. It was back then, and remains today, one of the most popular in the world. The reason is simple. With Video Arcade you can choose from such a large variety of game cartridges that your family should always enjoy playing with it.

IT WORKS LIKE A MINIATURE COMPUTER

The heart of this system is a micro-processor. By simply inserting a game cartridge, you automatically program the system to play a new series of exciting video games . . . all in vivid color on color TV sets, action sound, on-screen scoring.

There's even a special skill-option control with novice and expert settings for each player so the games can be made more challenging as your skills increase.

INCLUDES TARGET FUN GAME CARTRIDGE

This cartridge lets you choose from seven different playfields and 27 different games. It turns your TV set into a shooting gallery of fun as you try to hit the clowns, ducks and rabbits darting across the screen. Different objects have different point values and the winner is the first player to score 99 points. Other games included in this cartridge are Anti-aircraft, Torpedo, Missile,

Bomber and Missile vs. Bomber. And each of these can be made more challenging by selecting versions using steerable missiles, barricades or smaller missiles. You can even play against the built-in robot.

EVERYTHING'S INCLUDED BUT THE TV SET

The streamlined, impact resistant plastic console is 14 by 9½ by 3¾ inches high. It attaches easily to your TV antenna terminals with the special game switch that's included. You get four plug-in controls to play the various games: two joystick controls with firing button and two paddle controls (order extra set of paddle controls sold separately at right for those cartridges that have 3 or

4 player capability). Requires no batteries . . . operates on a 9-volt power supply with 16-foot cord. Just plug it in to any 110-v. AC outlet.

The new Atari 400™ Personal Computer System can teach, play games and help organize your life —but it doesn't take a genius to use it

For many people a computer is one of those exotic "number crunchers" that calculates satellite orbits or audits tax returns in the blink of an eye. Until now, the idea of actually owning and operating one of the things (even a small one) didn't seem to be practical or even possible for the average person.

The Atari 400™ personal computer system lets a novice begin using the computer for exciting, educational and useful purposes by simply placing pre-programmed cartridges (sold separately) into the console and pressing a few buttons. Of course, the system is also designed to keep on challenging you for years to come because it is a powerful general purpose computer you can program yourself.

$$\left(\frac{1/2 + 3/7}{2.3 - 1}\right) \left(\frac{4^3 - 3^2}{11/4}\right)$$

LIKE EVERY
COMPUTER
THIS ONE
PERFORMS MANY
MATHEMATICAL
FUNCTIONS WITH
UNCANNY SPEED

Inside the sleek computer console there's a powerful electronic brain and memory that can store and manipulate over 8000 bytes ("8K" in computer lingo) of information at a time. Among other things, this power can be used to perform a wide variety of arithmetic and advanced mathematical computations with numbers up to 10 digits long. In a more practical vein, you can use the computer's capacity to store names, numbers, addresses, even recipes then recall and sort them in an infinite variety of ways. But that's not all. Look what can be done using the optional cartridges and cassettes sold on the facing page.

IT CAN ALSO BE A TEACHING MACHINE

By inserting the Educational Cartridge into the console you've programmed the brain to teach a variety of courses.

TAKE A COURSE IN SOCIOLOGY

Use one of the Educational Cassettes with the Program Recorder (sold on facing page) and the system automatically begins teaching by using a printed text, spoken voice and simple graphics. As the lesson progresses the computer tests you by asking multiple-choice questions. Answer questions by pushing keys on the console. If you answer incorrectly, the computer lets you know. If you are correct, the computer continues the lesson.

In years to come additional cassettes will be offered on subjects from auto mechanics to foreign languages. Like having a kindergarten thru university teacher in your living room.

PLAY 1, 2, 3 OR 4-MAN BASKETBALL

TRY 1 TO 4-PLAYER SUPER BREAKOUT

PLAY GAMES MADE FAMOUS BY ATARI

The Game Cartridges make full use of the computer's ability to add lively action, color and sound as well as a wide variety of game options to challenge and entertain you.

With up to 4 optional Joystick Controllers (sold on facing page) you and your friends can play life-like basketball by running, jumping, blocking shots, dribbling and shooting baskets. Score and elapsed time is shown on the screen.

With up to 4 optional Paddle Controllers you and your friends can compete in exciting Super Breakout. Or, if you choose, play either game against the computer.

CREATE BEAUTIFUL KINETIC ART USING THE LIFE CARTRIDGE

WATCH COLORFUL PATTERNS DEVELOP

Translating electronic impulses into exciting full-color graphic displays is one of this system's many talents. Using the Life Cartridge and up to 4 optional Joystick Controllers select the color, shape and direction of graphic elements and watch the computer create fantastic arrangements that grow and evolve like exotic blossoms on your TV screen.

YOU CAN EVEN COMPOSE MUSIC

Plug in Music Composer Cartridge, arrange or change notes on your TV screen with an opt. Joystick Controller. Enter key and tempo, too. Touch button to hear tune played. Save music on blank cassette using Program Recorder.

YOUR TUNE IS SHOWN AND PLAYED

DO YOUR OWN PROGRAMMING

The cartridges and cassettes sold on the facing page and those to come in the future make using a computer useful and fun with little need to understand just how the computer works. Sooner or later, though, you'll get the itch to create your own games, handle business and home finance problems, keep household records, mailing and recipe lists and a-thousand-and-one other applications that will develop over the years. That's why the system includes a Basic Language Cartridge, Basic Language Instructional Cassette and a 332-page Programming Textbook. With them you can "talk" to the computer on its own terms. Using the Program Recorder you can store your own specialized programs on ordinary audio tape cassettes for later use.

THE BASIC SYSTEM IS VERY VERSATILE

PROGRAM PICTURES, CHARTS, GRAPHS

You enter, alter and manipulate text, graphics and sound input using the 57-key touch sensitive typewriter layout and 4 special function keys. Type in upper and lower case, change colors, sound and display 44 different graphic symbols. Insert optional program cartridges into console to add specialized instructions to memory.

The 13 1/2 x 11 1/2 x 4 1/2-in. high console has input jacks for up to 4 controllers plus the Programming Recorder. A TV switch box lets you attach the console to any TV set. Console operates on 9 v.; AC adapter incl. System also incl. Basic Language Cartridge and Instructional Cassette, textbook and operating manual.

Instant Translator

Interprets words and phrases from one language to another at the touch of a few buttons . . . and it's a calculator and metric definer, too

Ordering an omelet in Yokohama could be a problem if you don't speak a word of Japanese. Now there's a way for you to communicate clearly in Japanese as well as German, French, Italian or Spanish—without saying a word—using this electronic interpreter and optional language capsules.

IT'S SO SIMPLE TO USE WHEN YOU TRAVEL

To translate words just enter them in English, press a button and see the foreign words flash on the screen in big blue letters. To help speed a "conversation", fifty common full and partial phrases are programmed into the unit and each is listed on its back along with a code letter. Tapping the phrase key and that code letter displays the entire phrase, instantly.

PRESS **PHR** TWICE PLUS LETTER FOR PARTIAL PHRASE

A Do you speak	L I would like
B How do you say	M How much
C Take me to	N Is there
D I am looking for	O What is
E Where is	P Is this
F How far is	Q Can you recommend

50 common phrases are programmed into the unit

A 1200-word English capsule is incl., there's space for two more capsules within the unit so you can even translate between foreign languages.

IT'S A GREAT LANGUAGE TEACHER

The computer can flash all of the words within its memory by category (for instance, all the words related to travel like "car", "fare", "ticket", etc.) by their frequency of use or alphabetically. It even helps correct misspelling and can clear-up double meanings (by asking whether the word "watch" means "to see" or "a clock", for example).

When long phrases won't fit on the 16-character display, they move across the screen (you can even control speed of movement). Plastic case: 6 3/4 x 3 1/2 x 1 1/2 in. high. Vinyl carrying case. Do you believe in lucky stars?

Believe in 'em or not, the new Zodiac™ Astrology Computer offers astral advice using modern electronics

With this fascinating electronic "brain" and the Zodiac™ Manual edited by world famous astrologer Sidney Omarr, you can chart horoscopes for anyone simply by knowing his or her birthdate, time and place

Whether you're a curious skeptic or a true believer, the Zodiac™ Astrology Computer can tell you which house your stars are moving into while you relax at home.

This electronic star gazer offers a two-edged advantage over other methods of determining your horoscope. It provides a "reading" that's far more personalized than horoscopes in the newspaper because you enter your own (or a friend's) day, time and place of birth into the computer's brain. And you won't have to travel to a professional astrologer for a daily survey of the comings and goings of cosmic influences.

INTRODUCING ZODIAC

Zodiac™, The Astrology Computer, is just the thing for people who believe that their lives are influenced by the stars. When used in conjunction with the Zodiac™ Manual, Zodiac™ can help you learn more about yourself, your friends, your past and your future.

ZODIAC™ MANUAL

The Zodiac™ Manual is a complete instruction and source book for Zodiac™, The Astrology Computer. The editor is well-known astrologer Sidney Omarr who is featured on his own radio program and in his daily astrology column which is published in newspapers throughout the world.

WHAT ZODIAC™ CAN DO FOR YOU

The Zodiac™ computer, when used with the Zodiac™ Manual, can furnish you with three different types of star-struck information.

In the Horoscope Mode, you can get a computer readout of the planetary positions at the time of your birth and a list of corresponding personality characteristics. With this information, plus the additional data found in the manual, you can chart anyone's horoscope simply by knowing the date, time and place of his or her birth.

In the Daily Preview Mode, Zodiac™ can clue you in to how the stars appear for any day you have in mind—past, present or future.

In the Advice Mode, the Zodiac™ computer can offer its opinion about some of the many questions you ask yourself each day: "Should I travel today?", "Is this a good time to start saving money or to spend it?", "Should I see my former boyfriend tonight?"

IT'S SIMPLE TO GET YOUR EXACT HOROSCOPE

As sophisticated as the computer sounds, the Zodiac™ is simple to use. To chart a horoscope, look in the manual to find the proper codes for the date and place of your birth and enter them in the computer. Next, punch in the time of your birth. Then, watch the lights and listen to the electronic sounds as Zodiac™ goes to work.

Code numbers will appear on the digital readout. Copy these down on the horoscope form provided and then match them up with the personality characteristics and assessments listed in the manual. It's that easy.

It's just as simple to get a daily preview or the computer's answer to a question. Just follow the directions in the manual.

Want to dig deeper? The Zodiac™ Manual can tell you how to work out more detailed astrological information.

Plastic unit measures 7x2 inches high. Manual and astrological charts included.

ORDERING INFORMATION: Uses two 9-volt alkaline batteries or AC adapter (not included).

It's a computerized bridge club in a box!

Built-in computer is so powerful it lets this electronic marvel play bridge as your partner, your opponents or both . . . or you can watch how the game "outsmarts" itself in fully automatic play

Need a fourth for bridge? Or a second, third and fourth? Or would you rather watch while four "others" play? Bridge Challenger® is always ready for a game, whether you're short a player or your bridge club is curious to see how a computer would have played their hands. Just tell the machine which positions to play (N, E, S, W), then deal out the custom cards as you normally would.

As each computerized player asks to see its hand, pass its cards—face down, one at a time—over the optical scanner and then place them in order on one of the three green felt playing fields provided.

In this manner, "everyone" sees only his own cards.

STAYMAN, GERBER AND BLACKWOOD PLUS SIX OTHERS

Bridge Challenger® automatically uses Stayman, Gerber and Blackwood. Assign each pair of partners one of the six additional conventions or variants that the machine knows: Preferred Minor, Strong Two Club and Weak One No-trump Openers, Jacoby Transfers, the Baron Convention and the possibility of specifying the strength of the 2NT reply following a suit opener. Follow your favorite conventions while entering your bids; the machine will automatically display its own bids on its turns, using the convention you selected for it. When bidding is completed, the screen displays the contract and play begins.

COMPUTERIZED DUPLICATE PLAY

Completing the contract does not have to end play. You also have the option to replay the hand. Just designate any new combination of human and machine players for full duplicate play. And if you wonder how the computer would have done if it had bid "three no trump" instead of "two spades," just override the electronic player's bid and substitute your own.

Bridge Challenger's 176,512 memory bits allow popular defensive play, finesse and squeezes. It rejects illegal bids, displays reneges, lets you review bidding (and the last trick played) and indicates vulnerability . . . all instantaneously.

100% solid state with solid hardwood housing 13 1/8 x 8 1/2 x 1 1/8 in. high. Comes with 2 decks of custom playing cards, carrying case, 9 volt adapter and 6-ft. cord for use with 110-v., 60-Hz. AC.

Computerized Racing

Thrill to the sound and split-second timing of big-time racing on the mini-car circuit with the electronic AFX® Data Race™ Control Center and Sound Tower

Strategy is the name of the game. Deciding how many pit stops to make, how much fuel you'll use, or how hard to push your machine can make the difference between taking the "cup" or losing the race. Now, there's a mini-car racing system that puts your strategic skills to the test.

PROGRAM A SHORT SPRINT OR A "500"

Enter the number of laps for a race into the Control Center computer. Big blue LED displays for each racer click off the laps as the cars pass through the start/finish gate.

DECIDE HOW MUCH FUEL TO TAKE ON

Adding fuel during the race takes precious time. If you put too many "gallons" of fuel into your car your competitor will be making tracks while you're at the pump. Take-on too few "gallons" and you'll be forced into a time-consuming pit stop because the computer automatically stops counting laps when your racer "runs dry". The digital read-out indicates how many "gallons" you've added.

GENTLEMEN, START YOUR ENGINES

With the Sound Tower you'll hear the sounds of a real race in progress. The Control Center's LED indicators actually count down the start of the race. All thru the race you'll hear the roar of big engines on the move. The computer sounds a victory "cheer" and shows the crowd which car won.

Four Games in one

The Game Machine™ lets you break the bank at Vegas playing Black Jack, go to a carnival with Shooting Gallery, test your logic as a Code Hunter or narrowly escape crack-ups in the Grand Prix

\$47.97

without batteries

Each game is one quarter of the fun, but you'll never run out of quarters while playing computer games in your own arcade! Forget about a coin slot . . . just a touch of a button and you're ready to play on a deluxe, tabletop console with large fluorescent display and realistic electronic sound effects. There's a different scoreboard and control panel for each game . . . colorful overlays pop in and out to change the look of the Game Machine™ and add to the excitement. Snap on the overlays, select a game and you're ready to play.

slot . . . just a touch of a button and you're ready to play on a deluxe, tabletop console with large fluorescent display and realistic electronic sound effects. There's a different scoreboard and control panel for each game . . . colorful overlays pop in and out to change the look of the Game Machine™ and add to the excitement. Snap on the overlays, select a game and you're ready to play.

FOUR DIFFERENT CHALLENGES IN ONE

Black Jack tests your daring and decision-making as you decide to "hit" or "stand" against an electronic dealer. It takes quick reflexes and an accurate "trigger finger" to hit Shooting Gallery's target as it dodges across the board on a zigzag, random or cyclic pattern. Code Hunter tests your powers of deduction as you try to crack a secret 4-digit code, while it takes precision coordination to win the Grand Prix.

FOUR FUNCTIONS PLUS MEMORY IN ONE

When play time's over, just take off the overlays to reveal a four-function, seven-digit calculator with floating decimal and memory storage for performing chain operations. Use it to add, subtract, multiply or divide.

Large buttons and display make it simple and fun for everyone.

Solid state construction, microprocessor operated. Plastic case and plastic coated overlays. Case measures 11x6 1/4x5 1/2 inches. Score pads for all games are included. Take it along in the car or leave it on a desk . . . unit operates on 6 "C" batteries (not included).

Price Breakthrough

Never before have we offered hand-held electronic games that are so much fun to play and so difficult to master yet are priced so low

Your choice of Electronic Numbers Game or Follow Me

Each **\$14.99** without battery or adapter

These aren't the first or the only hand-held computer games that challenge your memory and powers of deduction. There are others on the market that play virtually the same way as our Follow Me and Electronic Numbers Game. What makes these so special is our \$14.99 price. Compare this price, compare the features and we're sure you'll agree that these are exceptional values.

Electronic Numbers Game

Here's the computer game that challenges you to break a secret code while the computer gives you the clues and keeps score.

IT'S ENTERTAINING AND EDUCATIONAL

Set secret 4-digit code for another player to solve or let the computer set one for you. Then begin testing numbers in different sequences. After each try the computer tells which are correct and in the right sequence until code has been broken.

WHO'S THE MASTERMIND IN YOUR FAMILY?

Play the Numbers Game by yourself. Or you can double the fun playing against someone else. In this version you're not only testing your code-breaking skills but also your ability to develop codes that are difficult to solve. You can even play with a group. Plastic case measures 5½ by 3½ by 1 in. high. Includes vinyl carry case, scorepad.

FOR AGES: 8 years to adult.

ORD. INFO: Instr. incl. Needs 1 alkaline 9-v. batt. or AC Adapter, not incl. Order battery on p. 666.

Electronic Follow Me

Probably no other type of hand-held electronic game is so easy to play yet so difficult to master. And that's why this game has become so popular with children and adults of all ages.

MATCH YOUR MEMORY AGAINST THE COMPUTER

Follow Me will play a random sequence of lights and sounds. All you have to do is repeat them by pressing the correct "Follow Me" buttons. Sound easy? Well it is for the first few series. But then each sequence becomes progressively longer and faster, too. If your memory is good enough you're rewarded with a victory tune—but if it isn't, Follow Me will signal loud and clear that you made a mistake.

THERE ARE 3 GAME VARIATIONS AND FOUR SKILL LEVELS

You can let the computer program the sequence of sounds and lights. Or you can set up the sequence for your opponent to follow. The computer remembers what has been the longest sequence followed correctly and will replay it at just a touch of a button. It will also recall the last sequence played whenever you wish. Even a group can have fun with Follow Me. In this version each player has a different color and remains in the game as long as he or she plays that color at the proper times. Make a mistake and you and your color are out of the game. The different skill levels make the game more challenging by playing longer and longer sequences to follow.

Follow Me is housed in a plastic case that's 5 inches in diameter, 2 inches high.

FOR AGES: 6 years to adult.

ORDER INFO FOR FOLLOW ME: Instr. incl. Requires one alkaline 9-v. battery or AC Adapter, not incl. Order battery on p. 666.
